LAN S Choo	Settings do se Settings	not apply to dial above for dial-u	-up connections. Ip settings.	LAN settings

2. Under **Proxy server**, click to select the **Use a proxy server for your LAN** check box.

3. In the Address box, type fcdcproxy

Local Area Network (LAN) Settings					
Automatic configuration Automatic configuration may override manual settings. To ensure the use of manual settings, disable automatic configuration.					
Use automatic configuration script Address					
Proxy server Use a proxy server for your LAN (These settings will not apply to dial-up or VPN connections).					
Address:     fcdcproxy     Port:     8080     Advanced       ✓ Bypass proxy server for local addresses					
OK Cancel					

4. In the **Port** box, type the port number that is used by the proxy server for client connections (by default, 8080). Type in the port field **8080** 

You can click to select the Bypass proxy server for local addresses check box if you do not

- 5. want the proxy server computer to be used when you connect to a computer on the local network (this may speed up performance).
- 6. Click **OK** to close the **LAN Settings** dialog box.
- 7. Click **OK** again to close the **Internet Options** dialog box.
